

## DAFTAR PUSTAKA

charton, T. D.; Taylor, G. B. *Water cannon apparatus and method for cleaning a tube bundle heat exchanger, boiler, condenser, or the like*. US Patent 4,773,357 (1988).

Gupta, A., Kumar, P., & Singh, S. (2023). *Optimization of Water Cannon Sootblowing in Coal-Fired Boilers Using Machine Learning Techniques*. *International Journal of Energy Research*, 47(5), 7150-7165.

hang, L., & Chen, H. (2022). *Dynamic Control Strategies for Water Cannon Sootblowing Systems in Thermal Power Plants*. *Energy Conversion and Management*, 250, 114880.

Kumar, S., & Singh, V. (2020). *Implementation of Smart Water Cannon Sootblowing System in Indian Thermal Power Plants*. *Energy Procedia*, 162, 365-371.

Valcon International. *Water Cannon – Cleaning of Steam Boilers*.

US Patent US7026598B1. Vector-Based Targeting Control for a Water Cannon.

Patel, R., & Joshi, M. (2021). Effect of Water Jet Parameters on Deposit Removal Efficiency in Boiler Tubes. *Journal of Thermal Engineering*, 7(3), 1452-1463.
